

Peak IP Solutions Since 2004, our clients have challenged us to help them **grow their businesses** through **intelligent use of technology**. We realize that most organizations have an understanding of where they want to go, but need assistance in **creating and implementing a technology plan** that supports their business goals. By combining our **years of experience**, relationships with industry leading manufacturers and broad range of services with our client's knowledge of their business we are able to help them **realize success**. This promotes a **valued partnership that lasts for years**. Thank you for the opportunity!

Infrastructure Foundation

Our **Expert Engineers** provide top tier Assessment, Design, Installation and Managed Services for a stable infrastructure to layer on your unique Line of Business applications.

Unified Communications

Peak IP can help streamline your business communications. Collaborate **anytime, anywhere** using advanced applications from an integrated, easy-to-use interface.

These applications include:

IM, Chat, Video, Integrated Voice and Web conferencing, Unified Voicemail, HD Video Conferencing and more...

Virtualization

Let one computer do the job of many by sharing the resources of a single computer across multiple environments, freeing you from physical and geographical limitations.

Security

We offer a complete range of products and services to protect critical data and operations while giving you peace of mind.

Storage & Data Center

Ensure business continuity with simple, secure, scalable network storage including offsite replication for continuous data protection.

Connectivity

We specify unique telecom services for both Voice & Data connectivity to help you save money with the right services to secure a competitive advantage.

IT Outsourcing and Managed Services

To aid in your business continuity, Peak IP Solutions brings together the technology and expertise to help address end-to-end business needs and transform operating efficiencies while lowering costs, reducing risks and improving customer care. We offer a **fully staffed, diversely trained** IT department for **IT Outsourcing, Monitoring and Managed Services**. We look forward to helping you reach your PEAK performance.
